 Xindong Wu, USA
 Yiming Ye, USA
 Ning Zhong, USA

Organization committee

Matjaž Gams, chair
 Mitja Luštrek, co-chair
 Mitja Lasič
 Jana Krivec
 Lana Jelenkovič

You are kindly invited to participate in the 12th international **Information Society – IS 2009** multiconference to be held in Ljubljana, Slovenia, Europe from 12th to 16th October 2009. IS 2009 will provide an international forum for scientists, academicians and professionals to present their latest research findings in the various fields of information society.

IS 2009 will consist of ten conferences:

- **Cognitive Sciences**
- **Cognitronics Workshop**
- **Collaboration, Software and Services in Information Society**
- **Data Mining and Data Warehouses (SiKDD)**
- **Education in Information Society**
- **Facing Demographic Challenges in Europe**
- **Intelligent Systems**
- **Mondilex Workshop**
- **Robotics**
- **Increasing Interests for Higher Education in Science and Technology**

The information society is changing the world as well as the Slovenian society. We should be aware of these changes and embrace them. The aim of the multiconference is not to provide the final answers to the problems of the information society, but to open an interdisciplinary debate and to explore different research directions. IS 2009 will serve as a forum for the world-wide and national community to explore current and future research trends, business opportunities and governmental policies – both European and American. The main objective is the exchange of ideas and the development of visions for the future of the information society.

Prospective authors are invited to submit papers presenting new research related to the conference topics. Submitted papers must be original and not currently under review by another conference or journal. They should stimulate the development of the information society and incorporate recent developments. Submitted papers should not be too technical in nature. Each conference has its own deadline for paper submission, with the latest being 15 September. The papers can be in English or in Slovene, depending on the conference, and should be up to four pages long in most cases. All the information on the multiconference and the individual conferences can be found at <http://is.ijs.si/>. All questions should be addressed to the organization committee or contact persons of the specific conferences.
