Over the past decade Israel has emerged as a one of the world's leading technological giants. Remarkably, despite its small size, Israel ranks **first in the world in venture capital investments** as a percentage of GDP and **first in R&D investment**. It has **the second-largest number of startup companies in the world** (after the United States). Israel is home to **12 Nobel Prize laureates** and a pioneer in industries ranging from biotechnology to financial engineering.

Monday, 10 February 2014
